

Foxfield Year 3 Homework

10th June 2022

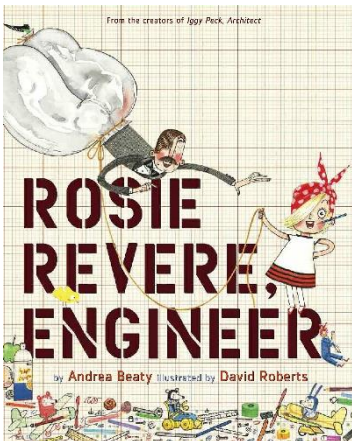

You can choose the homework task you would like to begin with. Some can be done more than once if you choose to do them in a different way. Please ensure you record your home learning in an appropriate way, using neat, cursive handwriting and return it to your teacher to share your learning with the class.

Reading

- Find a chapter book that you like and note down new vocabulary. List these words and use a dictionary or Google to find the definitions. You can add to your list whenever you find a word in a book that you are unsure of.
- Authors often use the technique of *show, not tell*. What phrases do they use to convey emotions felt by the characters? How realistic are these portrayals?
- What setting descriptions have you come across in your reading? Draw an image for each, labelling the features described in the books you have read.

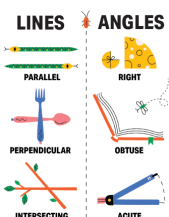

Writing

- The story *Rosie Revere, Engineer* is a beautifully-illustrated tale of a girl and her dream to become a great engineer. What is your dream? Write a paragraph outlining your plans for the future.
- Where some people see rubbish, Rosie sees inspiration. What could you invent from the odds and ends found in your home? Don't forget to explain how it works!
- Initially, Rosie is afraid of failure...until her great, great-aunt Rose teaches her that you only truly fail if you quit. Imagine you are Rosie, giving a speech upon finally winning the Nobel Prize. What motivational advice would you give to the future student inventors of the world?

Maths

This half term we are learning about position, shape and space. What angles can you find in your home? Can you see any examples of the 3 different types of lines?

We're also going to be talking about mass, so why not try baking some of your favourite recipes with an adult? What units of measures are used? Which is the heaviest? The lightest?

This half term we're also revising the times table facts covered this year – x4, x8, x3, x6 and x12. Try completing a blank multiplication grid to help identify links between these facts.

Geography

We're continuing with our topic of ancient Egyptians this half term, focusing on the geography of the area instead. Create a poster showcasing any facts you can find about the importance of the River Nile to ancient Egyptians. Why did they choose to settle here? How is the River Nile different to the River Thames? Draw the River Nile and identify the key features of a river we covered in our last geography topic.

French

In French we will be learning the French equivalent for the months of the year. Use the games at StudyStack to help you practise - <https://www.studystack.com/flashcard-1817676>. Which months are similar to their English counterparts?

Science

Shadow Puppets! Watch <https://www.youtube.com/watch?v=yqmXAm1Cw3k> for inspiration. How can you make your shadow puppet bigger, longer, or lighter? Finally, use your shadow puppets to tell a story!

RE

How do the key beliefs and main teaching of Buddhists fit in with our school values? Are there any connections with your religion? If you do not have a religion, how do these fit in with your own beliefs about the world?
